

Lanyard with the Square

What To Do

1. Insert one end of the purple lace through the key ring. Position the key ring at the center of the lace. Cross the lanyard laces at the centers, with the yellow lace over the purple lace below the key ring.

2. Fold the top purple lace down over the yellow lace. Loop the lanyard through the key ring to begin.

3. Fold the left yellow lace to the right over the top purple lace. Fold the yellow lace over to start the pattern.

4. Fold the back purple lace up over the yellow laces. Up and over goes the purple.

5. Fold the back yellow lace over the right purple lace and under the left purple lace.

Now you're weaving!

6. Pull all laces tight to form a square. Insert the anchor lace or safety pin through the key ring to anchor.

Get set, the action is about to begin...

7. Follow -- and repeat -- these steps to make 3 inches of woven key chain:

a. Fold the top purple lace down over the right yellow lace, and fold the bottom purple lace up over the left yellow lace.

b. Fold the left yellow lace to the right over the nearest purple lace and under the next purple lace. Fold the right yellow lace to the left over the nearest purple lace and under the next purple lace.

c. Pull all the laces tight.

d. Fold the top purple lace down over the left pink lace, and fold the bottom purple lace up over the right pink lace.

e. Fold the right yellow lace to the left over the nearest purple lace and under the next purple lace. Fold the left yellow lace to the right over the nearest purple lace and under the next purple lace. Pull all the laces tight.

8. Make sure all four laces are pulled tight. Thread three pony beads on all four laces. Tie all the laces together in a tight knot. Trim the ends to 3 inches. Remove the anchor.
